

## ENGINEER – IN -TRAINING – FIELD CONSTRUCTION

**(For local candidates only – Lower Mainland of BC)**

If you're an Engineer-In-Training with a mechanical engineering background looking for an opportunity to work in the field, then we'd love to hear from You!

We're Murry-Latta Progressive Machine Inc., specialists in custom industrial machine solutions for customers across BC's Lower Mainland. We've been in business since 1918, and provide a full spectrum of machine manufacturing, repair, installation and moving services supported by project management, mechanical and structural design, steel fabrication, welding, manual and CNC machining, rigging and millwright services.

*Our business is growing rapidly and we're looking for an enthusiastic and creative Engineer in Training to join our project team working at YVR.*

### ***Ideally, you're someone who brings:***

- A Degree or diploma in Mechanical Engineering with proficiency in AutoCAD, Excel, and MS Project software.
- Solid and current understanding of engineering principals and drafting procedures and able to apply in specific situations, adjusts and correlates data, recognizes discrepancies in results and follows operations through a series of related, detailed steps or processes.
- Able to adapt to changing circumstances and make the right judgment calls in a fast-paced environment.
- Team capabilities; for long-term success.

### ***Primary Responsibilities:***

- Working with our Professional Project Engineer on projects from concept to commissioning, delivering winning on-site solutions and project management that meets or exceeds customer expectations.
- Ensure optimal applications of technology and engineering resources under the direction of the MLPM Project Manager in regards to all commercial aspects of a project, including scheduling (meetings), change orders, work plans, safety meeting and progress invoicing.
- Working with our Professional Project Engineer in planning, manpower scheduling, inspections, design, testing and/or environment.
- Interaction with external consulting engineers and customers.

### ***Why You Should Apply:***

Murray-Latta offers our professionals full support and the resources they need to be successful, along with a high degree of autonomy; we're fast paced and bureaucracy free. You can truly get things done here, delivering on unique one-of-a kind projects and machinery solutions across a variety of industries. The diversity of our projects is unparalleled. With competitive compensation and a full extended health and benefits package, You'll enjoy career success you never thought possible. To apply, please submit your resume and cover letter in confidence to [hr@mlpmachine.com](mailto:hr@mlpmachine.com). We'll acknowledge all those who express interest. For more information, please call Bob Barnard at 604.328.2381.

NOTE: unfortunately, we are not able to accept applications from candidates who live outside of the Lower Mainland of BC.
